ACADEMICS

2020–2023	<u>National Taiwan University</u> MA in Linguistics	GPA 4.19/4.3
-----------	----------------------------------------------------------------------	--------------

Relevant courses: Introduction to Syntax; Introduction to Phonology; Linguistic Fieldwork; Advanced Phonetics; Seminar on Cognitive Linguistics and Psychology; Special Topics on Text Mining and Natural Language Processing; Introduction to Psycholinguistics; Introduction to French Linguistics; Second Language Acquisition; Chinese Phonology; The Use of Ultrasound for Linguistic Research; Language and Society; Physiological Basis and Functions in Speech Production; Research Methodology; Data Analysis and Machine Learning with Python

2015–2020	<u>National Chengchi University</u> BA in English European Languages and Cultures (Division of French Language and Culture)	GPA 4.00/4.3
-----------	------------------------------------------------------------------------------------------------------------------------------------------------------------------	--------------

Relevant courses: Introduction to Linguistics; Syntax; Introduction to Phonology; Language and Cognition; Development of the English Language; Conference Presentation and Journal Publication

RESEARCH EXPERIENCE

Speech Behavior and Science Lab (PI: Dr. Chenhao Chiu) Lab Member & Research Assistant <u>Notable projects</u> High/low vowel differences in laryngeal height and EGG amplitude for different tones <ul style="list-style-type: none">Supervised lab interns on experiment design, experiment conduction, and analyses.Developed pipelines for data analysis and visualization for multi-channel data. Lip postures of Taiwan Mandarin High vowels <ul style="list-style-type: none">Developed automated face recognition for linguistic purposes with MediaPipe.Designed automated lip landmark tracing for side faces with cluster analysis. Squliq Atayal corpus construction <ul style="list-style-type: none">Labeled 20-hour-long recordings of Squliq Atayal produced by one female informant.Cataloged the sound inventory of Squliq Atayal.Assisted Squliq Atayal speech auto-segmentation.	Graduate Institute of Linguistics National Taiwan University <i>July, 2021–</i>
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------

Prof. Hsuan-Lei Shao Research Assistant <u>Projects</u> Legal judgment similarity computation <ul style="list-style-type: none">Devised a novel similarity computation based on graph analysis of textual data.Overcame the lack of prior-case citations in the continental law system. Association-rule-based domain-specific collocation extraction <ul style="list-style-type: none">Extracted domain-specific collocations in two different corpora (legal judgments and President Jing-Ping Xi's talks) through iterative word re-segmentation based on (average) MI (mutual information).Devised an algorithm for (average) MI threshold determination based on mean sentential word ratios.Built a package that performs calculation of (average) MI for adjacent bigrams, re-segmentation of the original sentences, and visualization of the sentences as binary trees.	Graduate Institute of Political Science National Taiwan Normal University <i>August, 2023–</i>
---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------

Prof. Te-Hsin Liu Research Assistant <u>Project</u> Interaction between L1 transfer and universal constraints for French-speaking Mandarin L2 learners <ul style="list-style-type: none">Conducted thorough literature reviews for weekly seminars.Devised and conducted suitable statistical analyses for the corpus data.	Graduate Program of Teaching Chinese as a Second Language National Taiwan University <i>July, 2021–October, 2022</i>
-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------

Prof. One-Soon Her Research student <u>Project</u> Classification of Paiwan questions <ul style="list-style-type: none">Conducted a thorough literature review.	Graduate Institute of Linguistics National Chengchi University <i>June, 2018–July, 2020</i>
----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------

- Conducted thorough fieldwork.
- Visualized the prosodic patterns of the collected materials.
- Authored a journal paper.

Thesis

Production and perception of tonal coarticulation in Taiwan Mandarin and Taiwan Southern Min

- Conducted a thorough literature review and found research gaps.
- Formulated hypotheses pertaining to the research gaps and designed experiments to validate these hypotheses.
- Independently completed three large-scale experiments.
- Devised and conducted suitable statistical analyses for the experiment data.
- Provided explanation for the experiment results.
- Authored a journal paper (in preparation).

Course/Personal Projects

Ultrasonic-and-optical-imaging-assisted automated speech correctness judgment model

Data Analysis and Machine Learning with Python

Lecturer: Prof. Tommy C.Y. Ho

Fall semester, 2023

- Conducted a thorough literature review on unfamiliar areas and found research gaps.
- Applied newly learned knowledge and skills to existing expertise; integrated distinct fields with linguistics.
- Designed a sophisticated neural network structure that combines two different forms of data, with a sound identification accuracy of 83%.

Word networks for ill-formed versus well-formed documents in Taiwan Mandarin

Special Topics on Text Mining and Natural Language Processing

Lecturer: Prof. Hsuan-Lei Shao

Fall semester, 2023

- Devised a pipeline to collect documents to form corpora with a static crawler.
- Self-taught word-embedding-related techniques.
- Built a word2vec model based on 1,000,000 documents.
- Conducted a thorough literature review on unfamiliar areas and found research gaps.
- Applied word networks to graph analyses.
- Developed a novel kind of word network based on word similarity and compared its properties with conventional word co-occurrence networks.

TEACHING EXPERIENCE

Technology of Brain Science

Lecturers: Prof. Joshua G.O. Soo & Prof. Chia-Lin Lee

Teaching Assistant

- Supervised students' term project progress.
- Provided students with coding assistance.
- Evaluated and graded students.

Graduate Institute of Brain and Mind Sciences

National Taiwan University

Spring semester, 2023

Uncovering Languages

Lecturer: Prof. Chenhao Chiu

Teaching Assistant

- Supervised students' term project progress.
- Provided students with coding assistance.
- Designed pop-up quizzes and mid-term exams.
- Supervised and led student's discussions in weekly tutorials.
- Evaluated and graded students.
- Prepared class materials.

Graduate Institute of Linguistics

National Taiwan University

Spring semester, 2023

Spring semester, 2022

Freshman English

Lecturer: Prof. Wen-Hsien Hsu

Teaching Assistant

Department of Foreign Languages and Literatures

National Taiwan University

Spring semester, 2021

Fall semester, 2020

- Gave oral presentation tutorials and example presentations.
- Supervised student's mid-term and final presentations.
- Evaluated and graded students.
- Prepared class materials.

PUBLICATIONS

Peer-reviewed Journal Articles

Huang, Po-Hsuan and Her, One-Soon. 2023. On a dichotomy of question types: The case of Paiwan. *Concentric: Studies in Linguistics*. To appear.

Selected Conference Articles

- Huang, Po-Hsuan and Liu, Yi-Chen. 2023, October 21. Ultrasonic-and-optical-imaging-assisted automated speech correctness judgment model. Tunghai International Conference on Second Language Teaching and Research (SLTR.THU). Taichung, Taiwan.
- Chiu, Chenhao and Huang, Po-Hsuan. 2023, August 7–11. Lip postures of high vowels in Taiwan Mandarin. International Congress of Phonetic Sciences (ICPhS). Prague, Czech.
- Huang, Po-Hsuan and Chiu, Chenhao. 2023, August 7–11. Perception of coarticulated tones in Taiwan Mandarin and Taiwan Southern Min. International Congress of Phonetic Sciences (ICPhS). Prague, Czech. [Poster]
- Huang, Po-Hsuan and Chiu, Chenhao. 2023, May 26–27. Tonal coarticulation in Taiwan Mandarin and Taiwan Southern Min. Hanyang International Symposium on Phonetics and Cognitive Sciences of Language (HisPhonCog). Seoul, Korea. [Poster]
- Huang, Po-Hsuan and Chiu, Chenhao. 2022, November 3–4. Articulation and syllabic affiliation of prenuclear glide in Taiwan Mandarin. Ultrafest X: Conference on Ultrasound Imaging for Speech and Language Research. Manchester, United Kingdom.
- Huang, Po-Hsuan, Lai, Jing-Hong and Liu, Te-Hsin. 2022, September 23–25. On the interaction between L1 Transfer and universal constraints – Evidence from the acquisition of Mandarin tones by French speakers. North American Conference on Chinese Linguistics (NACCL). Bloomington, IN, United States.
- Huang, Po-Hsuan and Chiu, Chenhao. 2022, January 6–9. Vowel-glide distinction in high vocoid diphthong structures in Squliq Atayal: An ultrasound and acoustic study. Annual Meeting of the Linguistic Society of America (AML). Washington, DC, United States. [Poster]
- Huang, Po-Hsuan. 2021, October, 23. Vowel-glide distinction in high vocoid diphthong structures in Squliq Atayal: An ultrasound and acoustic study. National Conference on Linguistics (NCL). Taipei, Taiwan.
- Huang, Po-Hsuan and Her, One-Soon. 2021, October 15–16. On a two-way distinction of questions in Paiwan. Young Scholars' Symposium on Taiwan Languages (YSSTL). Online.

Works in progress

- Huang, Po-Hsuan and Chiu, Chenhao. Production and perception of tonal coarticulation: The cases of Taiwan Mandarin and Taiwan Southern Min. Submitted.
- Huang, Po-Hsuan and Shao, Hsuan-Lei. Comparison between the structures of word co-occurrence and word similarity networks for ill-formed and well-formed texts in Taiwan Mandarin. Manuscript.
- Huang, Po-Hsuan and Shao, Hsuan-Lei. Domain-specific collocation extraction in Mandarin based on iterative average mutual information. In preparation.
- Huang, Po-Hsuan. Improving text classification with construction embedding. In preparation.

SERVICE & ACTIVITIES

Organizer, Education Camp for Rural Schools, NCCU	February–August, 2017
President of Activity, Changhua Student's Association, NCCU	July, 2017–June, 2018
Vice organizer, Education Camp for Rural Schools, NCCU	September, 2016–January, 2017
Leading actor, Concours universitaire national de théâtre, Taiwan	May, 2017
Project manager, Education Camp for Rural Schools, NCCU	August, 2016
Voluntary after-school tutor, Wanhsing Elementary School, Taipei	Spring semester, 2016

SKILLS & KNOWLEDGE

Languages: Mandarin (native); Southern Min (native); English (advanced); French (advanced); Spanish (basic)

Programming languages/software: Python; R; Javascript; Praat Script; Psychopy; E-Prime; Matlab; bash

Packages/modules:

- Data analyses: numpy; scikit-learn; statsmodels; pandas; lme4
- Visualization: matplotlib; seaborn; plotly
- Image processing: OpenCV; MediaPipe
- Acoustic analyses: parselmouth; wave
- Others: tensorflow; jieba; ckip; tkinter; PyPI; cython, git

Statistical analyses: fundamental analyses (e.g., t-test, ANOVA); dimensionality reduction (including PCA, LDA, etc.); regression/modeling (including linear/logistic regression, LMM, GLM, GAMM, etc.); cluster analysis (hierarchical; K-Means); correlation-related analyses (including fundamental correlation analyses, CCA, Apriori Algorithm, mutual information, etc.); basic graph analyses

Machine learning: linear/logistic regression; SVM; decision tree; random forest; KNN; neural networks (including CNN, spatial-transformer network, RNN, GAN, etc.)

Laboratory instrumentation: ultrasound; electromyography; electroglottography
