HUANG Po-Hsuan

3601 Watt Way Grace Ford Salvatori 301 Los Angeles CA 90089 | pohsuan@usc.edu | peh-suan.github.io

EDUCATION

Ph.D.	*2024–*	**University of Southern California, CA** Linguistics
M.A.	*2020–2023*	**National Taiwan University, Taipei, TW** Linguistics
		Thesis: Production and perception of tonal coarticulation in Taiwan Mandarin and Taiwan Southern Min
B.A.	*2015–2020*	**National Chengchi University, Taipei, TW** English, French (majors)

GRANTS & HONORS

Taiwan Global Fellowship *2024–2027*
Ministry of Education, Taiwan

Graduate School Fellowship *2024–2025*
Dornsife College of Letters, Arts and Sciences, USC

Dean's List *2017*
National Chengchi University

RESEARCH EXPERIENCE

Natural Language Processing and Sentiment Analysis Lab (PI: Dr. Lun-Wei Ku)	Institute of Information Science Academia Sinica
Full-time Research Assistant	*February, 2024–June, 2024*

Projects (on-going)

Enhancing abstract reasoning for LLMs and VLMs

- Built a multi-hop instance-association dataset aimed for enhancing language models' abstract reasoning ability.

VLM-based ultrasonic-optical speech production learning tool

- Using a large open-source lingual ultrasound corpus to train VLMs as speech production assistants for L2 acquisition/speech therapy.

Linguistic relativity in LLMs

- Investigating linguistic influence on multilingual LLMs' performances.

Speech Behavior and Science Lab (PI: Dr. Chenhao Chiu)	Graduate Institute of Linguistics National Taiwan University
Lab Member & Research Assistant	*July, 2021–February, 2024*

Notable projects

High/low vowel differences in laryngeal height and EGG amplitude for different tones

- Supervised lab interns on experiment design, experiment conduction, and analyses.
- Developed pipelines for data analysis and visualization for multi-channel data.

Lip postures of Taiwan Mandarin High vowels

- Developed automated face recognition for linguistic purposes with MediaPipe.
- Designed automated lip landmark tracing for side faces with cluster analysis.

Squliq Atayal corpus construction

- Labeled 20-hour-long recordings of Squliq Atayal produced by one female informant.

- Cataloged the sound inventory of Squliq Atayal.
- Assisted in Squliq Atayal speech auto-segmentation.

Prof. Hsuan-Lei Shao   **Research Center for Digital Law**
National Taiwan University

Research Assistant   *August, 2023–December, 2023*

<u>Projects</u>

Legal judgment similarity computation

- Devised a novel similarity computation based on graph analysis of textual data.
- Overcame the lack of prior-case citations in the continental law system.

Association-rule-based domain-specific collocation extraction

- Extracted domain-specific collocations in two different corpora (legal judgments and political talks) through iterative word re-segmentation based on (average) MI (mutual information).
- Devised an algorithm for (average) MI threshold determination based on mean sentential word ratios and the elbow method.
- Built a package that performs calculation of (average) MI for adjacent bigrams, re-segmentation of the original sentences, and visualization of the sentences as binary trees.

Prof. Te-Hsin Liu   **Graduate Program of Teaching Chinese as a Second Language**
National Taiwan University

Research Assistant   *July, 2021–October, 2022*

<u>Project</u>

Interaction between L1 transfer and universal constraints for French-speaking Mandarin L2 learners

- Conducted thorough literature reviews for weekly seminars.
- Devised and conducted suitable statistical analyses for the corpus data.

Prof. One-Soon Her   **Graduate Institute of Linguistics**
National Chengchi University

Research student   *June, 2018–July, 2020*

<u>Project</u>

Classification of Paiwan questions

- Conducted thorough fieldwork.
- Visualized the prosodic patterns of the collected materials.
- Authored a journal paper.

<u>**Thesis**</u>

Production and perception of tonal coarticulation in Taiwan Mandarin and Taiwan Southern Min

- Formulated hypotheses pertaining to the research gaps and designed experiments to validate these hypotheses.
- Independently completed three large-scale experiments.
- Devised and conducted suitable statistical analyses for the experiment data.
- Provided explanation for the experiment results.
- Authored a journal paper (under review).

<u>**Course/Personal Projects**</u>

Ultrasonic-and-optical-imaging-assisted automated speech correctness judgment model

Data Analysis and Machine Learning with Python

Lecturer: Prof. Tommy C.Y. Ho

Fall semester, 2023

- Applied newly learned knowledge and skills to existing expertise; integrated distinct fields with linguistics.
- Designed a sophisticated neural network structure that combines two different forms of data, with a sound identification accuracy of 83%.

Word networks for ill-formed versus well-formed documents in Taiwan Mandarin

Special Topics on Text Mining and Natural Language Processing

Lecturer: Prof. Hsuan-Lei Shao

- Devised a pipeline to collect documents to form corpora with a static web crawler.
- Self-taught word vectorization.
- Built a word2vec model based on 1 million documents.
- Applied word networks to graph analyses.
- Developed a novel kind of word network based on word similarity and compared its properties with conventional word co-occurrence networks.

Simulated production and perception of tonal coarticulation through communication neural agents

- Developed speaker/listener neural agents in tone communication.
- Self-taught related deep learning knowledge, including multilayer perceptrons and communication networks.
- Successfully induced human-like behaviors, including perceptual normalization and avoidance of coarticulation based on different tone distributions.

TEACHING EXPERIENCE

Technology of Brain Science   **Graduate Institute of Brain and Mind Sciences**
Lecturers: Prof. Joshua G.O. Soo & Prof. Chia-Lin Lee   **National Taiwan University**

Teaching Assistant   *Spring semester, 2023*

- Supervised students' term project progress.
- Provided students with coding assistance.
- Evaluated and graded students.

Uncovering Languages   **Graduate Institute of Linguistics**
Lecturer: Prof. Chenhao Chiu   **National Taiwan University**

Teaching Assistant   *Spring semester, 2022/2023*

- Supervised students' term project progress.
- Provided students with coding assistance.
- Designed pop-up quizzes and mid-term exams.
- Supervised and led student's discussions in weekly tutorials.
- Evaluated and graded students.
- Prepared class materials.

Freshman English   **Department of Foreign Languages and Literatures**
Lecturer: Prof. Wen-Hsien Hsu   **National Taiwan University**

Teaching Assistant   *Fall semester, 2020/Spring semester, 2021*

- Gave oral presentation tutorials and example presentations.
- Supervised student's mid-term and final presentations.
- Evaluated and graded students.
- Prepared class materials.

INVITED TALKS

"Implementation of Praat through Python"   *November, 2024*
Department of Linguistics, USC, CA
"Electroglottography in linguistics research with Python"   *March, 2024*
Institute of Linguistics, Academia Sinica, Taipei
"Face extraction with MediaPipe in linguistics research"   *October, 2023*
Speech Behaviours and Speech Sciences In-class Talk, Taipei
"Face extraction with MediaPipe in linguistics research"   *November, 2022*
MultiMoco NTU Workshop, Taipei
"Using PCA and LDA for ultrasound image classification"   *November, 2021*

The 1st NTU GIL Ultrasound Workshop, Taipei

PEER-REVIEW SERVICE

Annual Meeting of the Association for Computational Linguistics (ACL)	*2024*

SERVICE & ACTIVITIES

Organizer, Education Camp for Rural Schools, NCCU	*February–August, 2017*
President of Activity, Changhua Student Association, NCCU	*July, 2017–June, 2018*
Vice organizer, Education Camp for Rural Schools, NCCU	*September, 2016–January, 2017*
Leading actor, Concours universitaire national de théâtre, Taiwan	*May, 2017*
Project manager, Education Camp for Rural Schools, NCCU	*August, 2016*
Voluntary after-school tutor, Wanhsing Elementary School, Taipei	*Spring semester, 2016*

SKILLS & KNOWLEDGE

Languages: Mandarin (native); Southern Min (native); English (advanced); French (advanced); Spanish (basic)

Programming languages/software: Python; R; Javascript; Praat Script; Psychopy; E-Prime; Matlab; SQL; bash; Swift

Packages/modules:

- Data analyses: *numpy*; *scikit-learn*; *statsmodels*; *pandas*; *network*; *lme4*
- Visualization: *matplotlib*; *seaborn*; *Plotly*
- Image processing: *OpenCV*; *MediaPipe*; *FFmpeg*
- Acoustic analyses: *parselmouth*; *wave*
- Text mining: *jieba*; *ckip*; *gensim*

Others: *tensorflow*; *PyTorch*; *tkinter*; *PyPI*; *pickle*; *cython*; *git*

Statistical analyses: fundamental analyses (t-test, ANOVA, etc.); dimensionality reduction (PCA, LDA, t-SNE, etc.); regression/modeling (linear/logistic regression, LMM, GLM, GAMM, etc.), cluster analysis (hierarchical; K-Means, etc.); correlation-related analyses (fundamental correlation analyses, CCA, Apriori Algorithm, mutual information, label ranking average precision scores, etc.); basic graph analyses

Machine learning: linear/logistic regression; SVM; decision tree; random forest; KNN; neural networks (CNN, spatial-transformer network, RNN, GAN, etc.); neural agent simulation, transformers and LLMs

Data structures & Algorithms: linked list, tree, array, A* pathfinding, Levenshtein distance

Laboratory instrumentation: ultrasound; electromyography; electroglottography

LICENSES & CERTIFICATIONS

Deep Learning Specialization [View]	Issued by: *Coursera*
