

Perceptual recoverability, articulatory efficiency & speech flexibility

- Would information-theoretic constraints behave differently in the articulatory & acoustic domains?

USC

Perceptual recoverability, articulatory efficiency & speech flexibility

- Speech production is often regarded as conditioned by:
 - Perceptual recoverability pressures
 - Articulatory efficiency pressures (Jun, 1995; Kirchner, 2001; Flemming, 2004; Cohen Priva, 2017)

Articulatory efficiency

Perceptual recoverability
